

Training: Introductory Risk Management

The Challenge

In today's business environment, understanding the importance of risk and uncertainty and its links to achieving business objectives, internal control and good governance is vital across all levels of the organisation.

Staff responsible for making decisions, dealing with issues, implementing effective controls are in the best position to manage risk. In some industries, risk management is mandated.

Our Solution

Our **Introductory Risk Management Training** is an excellent way to help introduce and reinforce the basic concepts of risk management to improve people's risk management skills and confidence.

The course is designed to help Directors, audit committee members, councillors, senior executives, line managers, team leaders, auditors, actuaries grasp the basic and most important concepts of risk management using the AS/NZS ISO 31000 risk management standard as the foundation of the course.

Course Overview

- Fundamentals of risk & uncertainty.
- Overview of the AS/NZS ISO 31000 risk management standard.
- Key terms.
- How to conduct a risk assessment – a step-by-step process of risk identification, analysis and evaluation and how to apply it in practice.
- How to complete a Risk Register and Treatment Plan
- How to address risk by identify and evaluating control effectiveness and developing treatments.
- Myths and barriers to good risk management.

The course includes DVD's, games and case studies to make learning fun, effective and memorable. Participants receive InConsult's Risk Management Workbook, including case studies and templates.

Participants can claim 6 hours CPE points (one day). A certificate of attainment is issued upon completion.

The course is also available as in-house training, modified to your risk management framework as either one-day or half-day training.
